Jacob Krueger

Portsmouth, NH 03801 | 603-923-3614 | jmk4u14@gmail.com | www.linkedin.com/in/jacobmkrueger | https://github.com/GeminiTrinity

SUMMARY

Wireless Sales Manager and Web Developer with a background in Full-Stack Development. Recognized as a great instructor, compassionate teammate, and very resourceful. Excellent in client relations, an eager mind set, and effective organization abilities. Graduate of University of New Hampshire with a Certificate in Full-Stack Web Development.

PROJECTS

Recip-EZ | https://github.com/kcushing1/Recipe-Organizer | https://recipez417.herokuapp.com/login

Summary: Looking for an area to keep track of all the recipes you have from friends, family, cookbooks, and even your own creations? Put in the recipe, some notes, a rating, and click save and it'll be saved to your unique log-in for years to come!

Responsibilities: I focused on the user interface, but mainly on the navigation bars. We utilized a second nav bar for when you would choose a specific source or type of dish to make navigating your long list of recipes easier.

Tools: HTML, CSS, Javascript, Express, Sequalize, Passport.JS, Axios. APIs: Unsplash Image

The Time Capsule | www.github.com/kcushing1/Time-Capsule | www.kcushing1.github.io/Time-Capsule/

Summary: This application is designed to give you information on weather, currency exchanges, Times articles, and more from five different locations across the world. Save your articles to read later if you leave the application and enjoy going through time!

Responsibilities: I was tasked with focusing on the user interface, making the project look and feel easy-to-use by any user. I also assisted with the Javascript side, especially with the calendar that sent information to the APIs we used.

Tools: HTML, CSS, Javascript, Materialize, jQuery. APIs: New York Times, Currency Exchange, Visual Crossing Weather

PROFESSIONAL EXPERIENCE
